Summary

Results-driven **Informatics Engineering student** at Universitas Komputer Indonesia with a dual focus on **IT infrastructure maintenance and data-driven problem solving**. Expert in high-level **hardware troubleshooting**, including complex printer repairs and PC assembly, alongside advanced **data visualization** using Looker Studio to drive business insights. Seeking a challenging **IT Support Internship** where I can apply my technical analytical skills to optimize system performance and support organizational technology goals.

Experience

Hardware & IT Support Technician (Project-based)

Independent Projects, Bandung, West Java

Nov 2023 — Current

- Hardware Specialist:** Successfully assembled custom PC builds and performed hardware upgrades for optimal performance.
- Technical Troubleshooting:** Diagnosed and repaired inkjet printers (G2000 series), specifically addressing mainboard issues and ink system malfunctions.
- System Maintenance:** Managed OS deployment by performing clean installations of Windows 11 and implementing routine system maintenance (cleaning temporary files, optimizing startup) to improve device speed.

Data Analyst

Independent Projects, Bandung, West Java

Jan 2026 — Feb 2026

- Created** an interactive Southeast Asia startup dashboard using Looker Studio to monitor 297 startups and \$1.85B in total investments.
- Identified** 80%+ market dominance in Indonesia’s E-Commerce sector through comparative regional analysis.
- Visualized** capital allocation patterns across SGP, IDN, MYS, and THA to highlight high-growth sectors like Marketplaces.
- Transformed** historical data from 2009–2013 into visual insights, tracking average investments of \$6.22M per startup.

Full Stack Developer (Project-based)

Independent Projects, Bandung, West Java

Dec 2025 — Jan 2026

- Developed** multiple web-based applications, including "DonasiYuk" and "RestoranPro," using the Laravel framework and PHP.
- Architected** robust MySQL database schemas and implemented SQL Triggers to automate business processes.
- Designed** comprehensive system documentations using UML modeling, including Use Case and Activity Diagrams.
- Integrated** secure user authentication and real-time transaction reporting features to enhance system functionality.
- Resolved** technical software bugs through rigorous testing to ensure high platform uptime and reliability.

Education

Bachelor of Informatics Engineering, Bandung, West Java, 2023 — 2027

Universitas Komputer Indonesia

- Currently an ongoing 6th-semester student focusing on Information Technology and Software Development.
- Maintained a strong Cumulative Grade Point Average (GPA) of **3.48/4.00**.
- Completed relevant coursework in Operating Systems, Computer Networking, Database Management, and Data Mining.
- Applied technical knowledge through practical projects in hardware maintenance and full-stack web development.

Skills

- **Critical Thinking**
- **Hardware Installation**
- **Technical Troubleshooting**
- **Hardware Maintenance**
